## **A word from the CEO**

mdi is a true business-to-business partner. We dedicate ourselves to thoroughly understanding our products and maintaining the most up-to-date information. Being the expert is the core of our business philosophy. We have a close relationship with our manufacturers and participate in regular product training sessions. We remain loyal to our brands and we believe that each of our products is among the best on the market.

We recognize that your needs are vitally important and deserve immediate attention, so contact mdi and speak with a knowledgeable member of our team who will help you get what you want.

*Sam Arledge*

- Sam Arledge  
President and CEO

**A** worldwide leader in designing custom Industrial Fire Suppression systems that can help you avoid catastrophic loss of life and property while assisting you in protecting assets and operating capacity.

**E**lkhart Brass is the industry's most experienced manufacturer of innovative fire fighting and fire protection equipment. We know fire fighting is inherently dangerous. That is why we make this commitment to you: We **promise** to do everything in our power to assure the products we provide are the highest quality and safest equipment available on the market.

# ELKHART BRASS

Fire Fighting Equipment

**HERO PIPE**

- The HERO Pipe's "floor below" design gives teams a safer option to neutralize hazardous material incidents from the floor below.
- Works from the exterior on most types of building construction or height.
- Delivers large volumes of water from an unmanned waterway.
- Even in buildings without a window sill, the system secures directly to the floor using hydraulic stabilizers.

## FIRELINE NOZZLES

Innovative new products, an impressive list of safety features and a record of uncompromised quality and reliability make **Elkhart nozzles** the industry standard for firefighting nozzles.

Elkhart Brass produces a range of heavy-duty nozzles with a wide array of flow rates dispensing CAF, Water and Fog. Whatever the application, **Elkhart** makes a nozzle for you.

Fire Fighting Equipment

## Monitors

From manual to electric or radio frequency monitors, **Elkhart Brass** is the established leader in the field of firefighting monitors (aka water cannons).

**Elkhart Brass** manufactures the largest selection of quality monitors available anywhere, so there is one suited to meet virtually every fire suppression need.

**Hannay Reels®**  
*The reel leader.*

**H**annay provides the world with the most durable and well-engineered reels in the industry that perform safely, efficiently, and economically.

Firefighters and rescue squads demand equipment that can deliver top performance under extreme conditions day after day. **Hannay Reels** help cut attack time and increase safety, which makes a big difference in an industry where the lives of your crew – and community – are on the line.

### *Why Buy a Hannay?*

- Performance –  
Allow for quicker deployment and pick up
- Custom design –  
Every vehicle manufacturer's truck design is different. Our reels are built to individual vehicle specs
- Small footprint –  
Deliver big performance in tight spaces

Hannay's Fire and Rescue Reels are perfect for:

- Dual agent – foam/water
- Breathing and utility air applications
- Hydraulic or Pneumatic power tools
- Extrications
- Electric cables for lights and tools
- Hazmat clean up

### Booster Hose

Ideal for quick first-attack for small fires and crash situations, while larger volume hoses are being set up. Direct (live) hook-up provides instant water flow no matter what length of hose is needed.

### Dual Agent/Foam

The dependable, dual internal design provides for controlled dispensing of foam chemicals.

### Rescue

Rescue reels that deliver fast, efficient payout for hydraulic and pneumatic power tools, electric cable, and breathing air applications.

### Flat Hose

Flat hose reels hold up to 70% more hose than hard hose in far less space than cross lay or mattydale. Since drain and rewind is a one-man operation, you'll save time and manpower and get your unit back in service quicker.

*“The Hose Company”*

**Key** Hose specializes in the design and manufacture of fire fighting hoses.

**Key** Hose produces hose to meet NFPA 1961, UL, MSHA, FM, FDA, and MIL-H-24606 standards.

**Key** Hose fire hose fits all major reel lines including **Hannay** and can be connected to **Elkhart Brass** systems!

# **Mueller Steam Specialty™**

## **Fire Line Strainers**

Mueller Steam Specialty is the world's largest supplier of strainers and provider of specialty products serving the valve industry.

These strainers are used to prevent clogging in fire service systems by straining foreign matter from the connected piping system. Such systems can include automatic water sprinklers, various spray systems or costly pumps, meters and valves.

### **911U Y-Strainers**

UL listed Y-strainers with flanged end connections. Available in diameters of 2 1/2 to 12 inches.

### **595 Simplex Strainers**

UL listed basket strainers with flanged end connections. Available in diameters of 4 to 12 inches.

## WEG High Efficiency Motors

**S**pecifically designed to meet or exceed all EPA requirements for energy efficiency. They are certified by the Department of Energy with a Certificate of Compliance number CC029A. These Fire Pump Duty motors are designed to provide maximum ventilation and heat dissipation. TEFC models are totally enclosed and fan-cooled to work in wet environments.
